

Chapter 7 Student Lecture Notes 7 1

The Feynman Lectures on Physics

sometimes been called "The Great Explainer". The lectures were presented before undergraduate students at the California Institute of Technology (Caltech)

The Feynman Lectures on Physics is a physics textbook based on a great number of lectures by Richard Feynman, a Nobel laureate who has sometimes been called "The Great Explainer". The lectures were presented before undergraduate students at the California Institute of Technology (Caltech), during 1961-1964. The book's co-authors are Feynman, Robert B. Leighton, and Matthew Sands.

A 2013 review in Nature described the book as having "simplicity, beauty, unity ... presented with enthusiasm and insight".

The Last Lecture

throughout his life. Chapter 1 "An Injured Lion Still Wants to Roar": Pausch has a dilemma in deciding to

give his last lecture or not. His desire to

The Last Lecture is a 2008 New York Times best-selling book co-authored by Randy Pausch—a professor of computer science, human-computer interaction, and design at Carnegie Mellon University in Pittsburgh, Pennsylvania—and Jeffrey Zaslow of the Wall Street Journal. The book extends the September 2007 lecture by Pausch entitled "Really Achieving Your Childhood Dreams". The Last Lecture is renowned for its witty humor, despite encompassing Pausch's farewell to his loved ones due to his terminal pancreatic cancer. In the book, through his past experiences, Pausch attempts to lend advice to his children that they may need once he has passed. He recounts memories growing up and important people who have been vital in "achieving his childhood dreams."

The geometry and topology of three-manifolds

version of the first three chapters of the notes. In 2022 the American Mathematical Society published a typeset version of the notes as part of the collected

The geometry and topology of three-manifolds is a set of widely circulated notes for a graduate course taught at Princeton University by William Thurston from 1978 to 1980 describing his work on 3-manifolds. They were written by Thurston, assisted by students William Floyd and Steven Kerchoff. The notes introduced several new ideas into geometric topology, including orbifolds,

pleated manifolds, and train tracks.

Newman College, Melbourne

Memorial Lecture, formerly referred to as the Daniel Mannix Memorial Lecture, or simply Mannix Memorial Lecture, was started by the Students' Club in

Newman College is an Australian Roman Catholic co-educational residential college affiliated with the University of Melbourne. It houses about 225 undergraduate students and about 55 postgraduate students and tutors.

The college is named after John Henry Newman, a former Anglican and major figure in the Oxford Movement who became a Catholic in the 19th century. Although affiliated with the University of Melbourne, a small number of students attend the Australian Catholic University, RMIT University and Monash University's Parkville campus.

The college motto is *Luceat Lux Vestra*, translated from Latin as "Let Your Light Shine".

Students' union

March 7, 2021. "University Act [RSBC 1996] CHAPTER 468"; February 24, 2021. Retrieved March 7, 2021. "Bill 184, College and University Student Associations

A students' union or student union, is a student organization present in many colleges, universities, and high schools. In higher education, the students' union is often accorded its own building on the campus, dedicated to social, organizational activities, representation, and academic support of the membership. It may also be a club.

Students' unions emerged in Europe during the nineteenth century. In the United States, student union often only refers to a physical building owned by the university with the purpose of providing services for students without a governing body. This building is also referred to as a student activity center, although the Association of College Unions International (largely US-based) has hundreds of campus organizational members. Outside the US, student union and...

Séminaire de Géométrie Algébrique du Bois Marie

geometry), Lecture Notes in Mathematics 288 and 340, 1972/3. SGA8 was never written. The occasional mentions of SGA8 usually refer to either chapter 8 of SGA1

In mathematics, the Séminaire de Géométrie Algébrique du Bois Marie (SGA; from French: "Seminar on Algebraic Geometry of Bois Marie") was an influential seminar run by French mathematician Alexander Grothendieck. It was a unique phenomenon of research and publication outside of the main mathematical journals that ran from

1960 to 1969 at the Institut des Hautes Études Scientifiques (IHÉS) near Paris. (The name came from the small wood on the estate in Bures-sur-Yvette where the IHÉS was located from 1962.) The seminar notes were eventually published in twelve volumes, all except one in the Springer Lecture Notes in Mathematics series.

Vorlesungen über die Entwicklung der Mathematik im 19. Jahrhundert

years, the lecture notes were only available as these typescripts. After Klein's death, Richard Courant and Otto Neugebauer edited the notes and published

Vorlesungen über die Entwicklung der Mathematik im 19. Jahrhundert (German for 'Lectures on the Development of Mathematics in the 19th Century') is a book by Felix Klein that was published posthumously in two volumes (volumes 24 and 25 of Grundlehren der mathematischen Wissenschaften) in 1926 and 1927.

Felix Klein had lectured on the development of mathematics in the 19th century and then on relativity during World War I. The books were created from the notes of these lectures and edited by Richard Courant and Otto Neugebauer for the first volume and Courant and Stefan Cohn-Vossen for the second. Some content that Klein had originally envisioned as part of the text is missing.

The book has been enthusiastically received and widely

praised. The first volume has been translated into Russian...

Hong Kong University Students' Union

application for becoming a student organisation to the Hong Kong Police, independent from the operation of the University. On 7 July 2021, the Council of

The Hong Kong University Students' Union (HKUSU; 香港大學學生會) was a student union founded in 1912 and registered under the Societies Ordinance in Hong Kong. It was the officially recognised undergraduate student representative body of The University of Hong Kong until 13 July 2021 after the union's council passed a motion in memorial to a deceased assailant who attacked and severely stabbed a police officer on the street.

Pnin (novel)

to give a guest lecture. He is persistently bothered by the fear that he may lose his lecture papers, or mix them up with the student essay he is correcting

Pnin (Russian: Пнин, IPA: [ˈpnʲin/]) is Vladimir Nabokov's 13th novel and his fourth written in English; it was published in 1957. The success of Pnin in the United States launched Nabokov's career into literary prominence. Its eponymous protagonist, Timofey Pavlovich Pnin, is a Russian-born assistant professor in his 50s living in the United States, whose character is

believed to be based partially on the life of both Nabokov's colleague Marc Szeftel as well as on Nabokov himself. Exiled by the Russian Revolution and what he calls the "Hitler war", Pnin teaches Russian at the fictional Waindell College, loosely inspired by Cornell University and Wellesley College—places where Nabokov himself taught.

Students for the Exploration and Development of Space

and graduate students from a diverse range of educational backgrounds and universities who are working to promote space. SEDS is a chapter-based organization

Students for the Exploration and Development of Space (SEDS) is a non-profit international student organization whose purpose is to drive space advocacy of space exploration and development through educational and engineering projects.
