List of Apache Software Foundation projects

*Apache DB Committee Derby: pure Java relational database management system JDO: Java Data Objects, persistence for Java objects Torque: ORM for Java DeltaSpike:*

This list of Apache Software Foundation projects includes the software development initiatives maintained by the Apache Software Foundation (ASF).

In addition to active projects, the ASF maintains several related areas:

Incubator: for projects that are in the process of becoming full ASF projects.

Attic: for ASF projects that have been formally retired.

INFRA (Apache Infrastructure Team): responsible for managing and providing the technical infrastructure and services used by all Apache projects.

Java (programming language)

*and some Java 7 features, offering an implementation compatible with the standard library (Apache Harmony). The use of Java-related technology in Android*

Java is a high-level, general-purpose, memory-safe, object-oriented programming language. It is intended to let programmers write once, run anywhere (WORA), meaning that compiled Java code can run on all platforms that support Java without the need to recompile. Java applications are usually compiled to bytecode that can run on any Java virtual machine (JVM) regardless of the underlying computer architecture. The syntax of Java is similar to C and C++, but has fewer low-level facilities than either of them. The Java runtime provides dynamic abilities (such as reflective programming (reflection) and runtime code modification) usually unavailable in traditional compiled languages.

Java gained popularity shortly after its release, and has been a popular programming language since then. Java was the third most popular programming language in 2022 according to GitHub. Although still widely popular, there has been a gradual decline in use of Java in recent years with other languages using JVM gaining popularity.

Java was designed by James Gosling at Sun Microsystems. It was released in May 1995 as a core component of Sun's Java platform. The original and reference implementation Java compilers...

List of web archiving initiatives

*2020-01-31. "Research Group for Media, Innovation and Communication Technologies". www.ugent.be. Retrieved 2020-01-31. "Ghent Centre for Digital Humanities"*

This article contains a list of web archiving initiatives worldwide. For easier reading, the information is divided in three tables: web archiving initiatives, archived data, and access methods.

Some of these initiatives may or may not make use of several web archiving file formats and/or their own proprietary file formats.

This Wikipedia page was originally generated from the results obtained for the research paper A survey on web archiving initiatives, published by the Arquivo.pt (the Portuguese web-archive) team at the time.
