

Becoming A Master Manager A Competency Framework

Chartered Management Institute

*of the world's first competency-based national management standards.
1992*

BIM merged with the Institution of Industrial Managers (IIM) to form the Institute - The Chartered Management Institute (CMI) is a professional institution for management based in the United Kingdom. It was founded as the British Institute of Management (BIM) in 1947 or 1948, merged with the Institution of Industrial Managers (IIM) in 1992 to form the Institute of Management (IM), and gained a royal charter, and its present name, in 2002.

The major membership classes are:

Member

Fellow – for those with significant expertise, and

Companion – the most senior grade.

In addition to supporting its members, the organisation encourages management development, carries out research, produces a wide variety of publications on management interests, and publishes the official members' magazine, Professional Manager. The institute also engages with government and other public bodies concerning...

Information management

required management competencies to derive real benefits from an investment in information are complex and multi-layered. The framework model that is the

Information management (IM) is the appropriate and optimized capture, storage, retrieval, and use of information. It may be personal information management or organizational. Information management for organizations concerns a cycle of organizational activity: the acquisition of information from one or more sources, the custodianship and the distribution of that information to those who need it, and its ultimate disposal through archiving or deletion and extraction.

This cycle of information organisation involves a variety of stakeholders, including those who are responsible for assuring the quality, accessibility and utility of acquired information; those who are responsible for its safe storage and disposal; and those who need it for decision making. Stakeholders might have rights to originate...

Chartered Engineer (UK)

problems. Competency C. Responsibility, management and leadership Chartered Engineers shall demonstrate technical and commercial leadership. Competency D. Communication

In the United Kingdom, a Chartered Engineer (CEng) is an engineer registered with the UK's regulatory body for the engineering profession, the Engineering Council. Chartered Engineers are master's degree qualified or must demonstrate equivalent masters level, work-based learning. The appropriate professional competencies must be demonstrated through education, further training and work experience. Significant experience is required which invariably spans several years of postgraduate professional practice. Demonstration of competence is defined in the UK Standard for Professional Engineering Competence, assessed through professional review of academic qualifications and professional development (training and professional work experience). Formal, non-formal and informal learning can be assessed...

Global supply chain management

framework allows managers to identify and implement the most important underlying capabilities that are encompassed in the six business competencies.

In commerce, global supply-chain management is defined as the distribution of

goods and services throughout a trans-national companies' global network to maximize profit and minimize waste. Essentially, global supply chain-management is the same as supply-chain management, but it focuses on companies and organizations that are trans-national.

Global supply-chain management has six main areas of concentration: logistics management, competitor orientation, customer orientation, supply-chain coordination, supply management, and operations management. These six areas of concentration can be divided into four main areas: marketing, logistics, supply management, and operations management. Successful management of a global supply chain also requires complying with various international regulations...

Apprenticeships in the United Kingdom

professional engineering institutions. The apprenticeship framework offered a clear pathway and competency outcomes that addressed the issues facing the industry

Apprenticeships have a long tradition in the United Kingdom, dating back to

around the 12th century. They flourished in the 14th century and were expanded during the Industrial Revolution. In modern times, apprenticeships were formalised in 1964 by act of parliament and they continue to be in widespread use to this day.

Health information management

Competency requirements are maintained by CAHIIM in their associate degree Entry-Level Competencies and Baccalaureate Degree Entry-Level Competencies

Health information management (HIM) is information management applied to health and health care. It is the practice of analyzing and protecting digital and traditional medical information vital to providing quality patient care. With the widespread computerization of health records, traditional (paper-based) records are being replaced with electronic health records (EHRs). The tools of health informatics and health information technology are continually improving to bring greater efficiency to information management in the health care sector.

Health information management professionals plan information systems, develop

health policy, and identify current and future information needs. In addition, they may apply the science of informatics to the collection, storage, analysis, use, and transmission...

Academic degree

a bachelor's and then master's or doctor's degree in these subjects. Thus, a degree was only a step on the way to becoming a fully qualified master -

An academic degree is a qualification awarded to a student upon successful completion of a course of study in higher education, usually at a college or university. These institutions often offer degrees at various levels, usually divided into undergraduate and postgraduate degrees. The most common undergraduate degree is the bachelor's degree, although some educational systems offer lower-level undergraduate degrees such as associate and foundation degrees. Common postgraduate degrees include engineer's degrees, master's degrees and doctorates.

In the UK and countries whose educational systems are based on the British system, honours degrees are divided into classes: first, second (broken into upper second, or 2.1, and lower second, or 2.2) and third class.

List of master's degrees in North America
