Muon tomography

*the accuracy of data on nuclear waste and Dry Storage Containers (DSC). Imaging of DSC exceeds the IAEA detection target for nuclear material accountancy*

Muon tomography or muography is a technique that uses cosmic ray muons to generate two or three-dimensional images of volumes using information contained in the Coulomb scattering of the muons. Since muons are much more deeply penetrating than X-rays, muon tomography can be used to image through much thicker material than x-ray based tomography such as CT scanning. The muon flux at the Earth's surface is such that a single muon passes through an area the size of a human hand per second.

Since its development in the 1950s, muon tomography has taken many forms, the most important of which are muon transmission radiography and muon scattering tomography.

Muography uses muons by tracking the number of muons that pass through the target volume to determine the density of the inaccessible internal...

Display resolution standards

*publication of the final draft. DSC support was reintroduced with the publication of DisplayPort 1.4 in March 2016. Using DSC, a &quot;visually lossless&quot; form*

A display resolution standard is a commonly used width and height dimension (display resolution) of an electronic visual display device, measured in pixels. This information is used for electronic devices such as a computer monitor. Certain combinations of width and height are standardized (e.g. by VESA) and typically given a name and an initialism which is descriptive of its dimensions.

The graphics display resolution is also known as the display mode or the video mode, although these terms usually include further specifications such as the image refresh rate and the color depth.

The resolution itself only indicates the number of distinct pixels that can be displayed on a screen, which affects the sharpness and clarity of the image. It can be controlled by various factors, such as the type...

List of equipment of the Italian Army

*Archived from the original on 2014-12-20. Retrieved 19 December 2014. &quot;Image: DSC\_6354.JPG, (1024 × 680 px)&quot;;. fiammeblu.it. Archived from the original on 2014-05-23*

Modern equipment of the Italian Army is a list of military equipment currently in service with the Italian Army.

Wikipedia:WikiProject Guild of Copy Editors/Backlog elimination drives/July 2012

*you know how to copy edit and that you are familiar with the Wikipedia Manual of Style before you begin copy editing—these are specially important for*

The following event has concluded. Please do not modify this page. Comments should be made on the talk page.

This Copy Editing Backlog Elimination Drive was a one-month-long effort of the Guild of Copy Editors to reduce the backlog of articles that require copy editing, signified with the {{copyedit}} tag or by a listing on the GOCE Requests page. Please make sure that you know how to copy edit and that you are familiar with the Wikipedia Manual of Style before you begin copy editing—these are specially important for articles listed on the Requests page. The drives are under the purview of the Guild's coordinators. The lead coordinator is Stfg (talk), and he is assisted by Allens (talk) and Torchiest (talk). If you have any questions, leave a message on the drive's talk page. This drive began...

Wikipedia:Administrators' noticeboard/Archive227

*(talk) 00:59, 15 September 2011 (UTC) Images that consist of a name such as &quot;DSC\*.jpg&quot;;, first off, need to be renamed at a minimum, if they're not going*

Wikipedia:CHECKWIKI/WPC 104 dump

*name="819helis"/&gt; 821 Naval Air Squadron: &lt;ref name="Puncher"&gt;, &lt;ref name="Trumpeter"&gt; 832 Naval Air Squadron: &lt;ref name="Begum"&gt; 84th Academy Awards: &lt;ref name="Chicago*

This page contains a dump analysis for errors #104 (Unbalanced quotes in ref name).

It can be generated using WPCleaner by any user. It's possible to update this page by following the procedure below:

Download the file enwiki-YYYYMMDD-pages-articles.xml.bz2 from the most recent dump. For example, on your.org, go to directory YYYYMMDD for the most recent date (for example 20171020), and retrieve the requested file (for example enwiki-20171020-pages-articles.xml.bz2).

Create a command file, for example ListCheckWiki104.txt with the following contents:

```
ListCheckWiki enwiki-$-pages-articles.xml.bz2 wiki:Wikipedia:CHECKWIKI/WPC_{0}_dump 104
```

Run WPCleaner in the command line with a command such as:

```
java -Xmx1024m -cp WPCleaner.jar:libs/* org.wikipediacleaner.Bot en user password DoTasks ListCheckWiki104...
```
