Postmodernism encompasses a variety of artistic, cultural, and philosophical movements that claim to mark a break from modernism. They have in common the conviction that it is no longer possible to rely upon previous ways of depicting the world. Still, there is disagreement among experts about its more precise meaning even within narrow contexts.

The term began to acquire its current range of meanings in literary criticism and architectural theory during the 1950s–1960s. In opposition to modernism's alleged self-seriousness, postmodernism is characterized by its playful use of eclectic styles and performative irony, among other features. Critics claim it supplants moral, political, and aesthetic ideals with mere style and spectacle.

In the 1990s, "postmodernism" came to denote a general – and...

Carl Jung

the formation of Alcoholics Anonymous. Jung was an artist, craftsman, builder, and prolific writer. Many of his works were not published until after

Carl Gustav Jung (YUUNG; Swiss Standard German: [kɑrl ʃʊŋ]; 26 July 1875 – 6 June 1961) was a Swiss psychiatrist, psychotherapist, and psychologist who founded the school of analytical psychology. A prolific author of over twenty books, illustrator, and correspondent, Jung was a complex and convoluted academic, best known for his concept of archetypes. Alongside contemporaries Sigmund Freud and Alfred Adler, Jung became one of the most influential psychologists of the early 20th century and has fostered not only scholarship, but also popular interest.

Jung's work has been influential in the fields of psychiatry, anthropology, archaeology, literature, philosophy, psychology, and religious studies. He worked as a research scientist at the Burghölzli psychiatric hospital in Zurich, under Eugen...

History of Native Americans in the United States

communities developed complex societies across North America. The Mound Builders created large earthworks, such as at Watson Brake and Poverty Point, which

The history of Native Americans in the United States began tens of thousands of years ago with the settlement of the Americas by the Paleo-Indians. The Eurasian migration to the Americas occurred over millennia via Beringia, a land bridge between Siberia and Alaska, as early humans spread southward and eastward, forming distinct cultures. Archaeological evidence suggests these migrations began 20,000 years ago and continued until around 12,000 years ago, with some of the earliest recognized inhabitants classified as Paleo-Indians, who spread throughout the Americas, diversifying into numerous culturally distinct nations. Major Paleo-Indian cultures included the Clovis and Folsom traditions, identified through unique spear points and large-game hunting methods, especially during the Lithic stage...

Solomon

a central biblical figure, who, according to the Hebrew Bible, was the builder of the First Temple in Jerusalem and the last ruler of the united Kingdom

Solomon (), also called Jedidiah, was the fourth monarch of the Kingdom of Israel and Judah, according to the Hebrew Bible. The successor of his father David, he is described as having been the penultimate ruler of all Twelve Tribes of Israel under an amalgamated Israel and Judah. The hypothesized dates of Solomon's reign are from 970 to 931 BCE. According to the biblical narrative, after Solomon's death, his son and successor Rehoboam adopted harsh policies towards the northern Israelites, who then rejected the reign of the House of David and sought Jeroboam as their king. In the aftermath of Jeroboam's Revolt, the Israelites were split between the Kingdom of Israel in the north (Samaria) and the Kingdom of Judah in the south (Judea); the Bible depicts Rehoboam and the rest of Solomon's patrilineal...

History of Baltimore

major builders between 1869 and 1896, especially as they gained access to building land and capital. Most, but not all, of the major builders were craftsmen

The history of Baltimore spans back to 1659, when the Baltimore County was declared erected by the General Assembly of Maryland. The area where the city now lays was settled by David Jones in 1661. While this has been inhabited by Indigenous people since the 10th millennium BCE, it was not until European settlers arrived that it was given the name Baltimore, after the Province of Maryland's founding proprietor.

The city of Baltimore was founded in 1729. Early on, it was largely populated by German immigrants. The city gained prominence as a major hub for trade and commerce after successfully fending off British forces during the War of 1812. Seeing to maintain this position, the Baltimore & Ohio Railroad was established in 1829, making it one of the first commercial railroad lines in the world...

Artificial intelligence is the capability of computational systems to perform tasks typically associated with human intelligence, such as learning, reasoning, problem-solving, perception, and decision-making. Artificial intelligence (AI) has been used in applications throughout industry and academia. Within the field of Artificial Intelligence, there are multiple subfields. The subfield of Machine learning has been used for various scientific and commercial purposes including language translation, image recognition, decision-making, credit scoring, and e-commerce. In recent years, there have been massive advancements in the field of Generative Artificial Intelligence, which uses generative models to produce text, images, videos or other forms of data. This article describes applications of...

Milton Friedman

always done this in the name of liberty. This word runs throughout Hayek's work, which his student Milton Friedman called the battle for freedom.

Milton Friedman (; July 31, 1912 – November 16, 2006) was an American economist and statistician who received the 1976 Nobel Memorial Prize in Economic Sciences for his research on consumption analysis, monetary history and theory and the complexity of stabilization policy. With George Stigler, Friedman was among the intellectual leaders of the Chicago school of economics, a neoclassical school of economic thought associated with the faculty at the University of Chicago that rejected Keynesianism in favor of monetarism before shifting their focus to new classical macroeconomics in the mid-1970s. Several students, young professors and academics who were recruited or mentored by Friedman at Chicago went on to become leading economists, including Gary Becker, Robert Fogel, and Robert Lucas Jr...

History of science

Chinese model having influenced Vietnam, Korea and Japan before Western exploration. Among the Pre-Columbian peoples of Mesoamerica, the Zapotec civilization

The history of science covers the development of science from ancient times to the present. It encompasses all three major branches of science: natural, social, and formal. Protoscience, early sciences, and natural philosophies such as alchemy and astrology that existed during the Bronze Age, Iron Age, classical antiquity and the Middle Ages, declined during the early modern period after the establishment of formal disciplines of science in the Age of Enlightenment.

The earliest roots of scientific thinking and practice can be traced to Ancient Egypt and Mesopotamia during the 3rd and 2nd millennia BCE. These civilizations' contributions to mathematics, astronomy, and medicine influenced later Greek natural philosophy of classical antiquity, wherein formal attempts were made to provide explanations...
