Copy protection, also known as content protection, copy prevention and copy restriction, is any measure to enforce copyright by preventing the reproduction of software, films, music, and other media.

Copy protection is most commonly found on videotapes, DVDs, Blu-ray discs, HD-DVDs, computer software discs, video game discs and cartridges, audio CDs and some VCDs. It also may be incorporated into digitally distributed versions of media and software.

Some methods of copy protection have also led to criticism because it caused inconvenience for paying consumers or secretly installed additional or unwanted software to detect copying activities on the consumer's computer. Making copy protection effective while protecting consumer rights remains a problem with media publication.

It was released, with a book with photographs taken during the tour, as both a 2-CD set and a 3-LP set (with 3–5 songs spread over 5 sides), which had a bonus track. "Jiseiki Hirake Kokoro" was originally made for a Fujifilm cassette commercial. It was included in Snakeman Show's self-titled album in mono so that the lyrics, which reference Fujifilm cassettes, could not be understood properly; it was presented here in stereo, and was included in the UC YMO compilation...
