

Multiple Choice Java Interview Questions And Answers

Minecraft

texture packs, and custom maps, which add new game mechanics and possibilities. Originally created in 2009 by Markus "Notch" Persson using the Java programming

Minecraft is a sandbox game developed and published by Mojang Studios. Formally released on 18 November 2011 for personal computers following its initial public alpha release on 17 May 2009, it has been ported to numerous platforms, including mobile devices and various video game consoles.

In Minecraft, players explore a procedurally generated, three-dimensional world with virtually infinite terrain made up of voxels. Players can discover and extract raw materials, craft tools and items, and build structures, earthworks, and machines. Depending on the game mode, players can fight hostile mobs, as well as cooperate with or compete against other players in multiplayer. The game's large community offers a wide variety of user-generated content, such as modifications, servers, player skins, texture...

Ruby on Rails

Heinemeier Hansson (6 September 2021) Rails 7 will have three great answers to JavaScript in 2021+ Archived 20 December 2021 at the Wayback Machine David

Ruby on Rails (simplified as Rails) is a server-side web application framework written in Ruby under the MIT License. Rails is a model-view-controller (MVC) framework, providing default structures for a database, a web service, and web pages. It encourages and facilitates the use of web standards such as JSON or XML for data transfer and HTML, CSS and JavaScript for user interfacing. In addition to MVC, Rails emphasizes the use of other well-known software engineering patterns and paradigms, including convention over configuration (CoC), don't repeat yourself (DRY), and the active record pattern.

Ruby on Rails' emergence in 2005 greatly influenced web app development, through innovative features such as seamless database table creations, migrations, and scaffolding of views to

enable rapid...

Groklaw

to make almost all of its documents public), and the release of the settlement answered many questions as to the ownership of the Unix intellectual property

Groklaw was a website that covered legal news of interest to the free and open source software community. Started as a law blog on May 16, 2003, by paralegal Pamela Jones ("PJ"), it covered issues such as the SCO-Linux lawsuits, the EU antitrust case against Microsoft, and the standardization of Office Open XML.

Jones described Groklaw as "a place where lawyers and geeks could explain things to each other and work together, so they'd understand each other's work better".

Its name derives from "grok", roughly meaning "to understand completely", which had previously entered geek slang.

Other topics covered included software patents, DMCA, the actions of the RIAA against alleged illegal file sharers, and actions against free and open software such as Android and Linux.

Video game programming

languages are usually procedural or object-oriented and implemented via compilers; for example, C, C++, and Java. However, developers may take into account domain-specific

Game programming, a subset of game development, is the software development of video games. Game programming requires substantial skill in software engineering and computer programming in a given language, as well as specialization in one or more of the following areas: simulation, computer graphics, artificial intelligence, physics, audio programming, and input. For multiplayer games, knowledge of network programming is required (the resultant code, in addition to its performance characteristics, is commonly referred to as the game's netcode by players and programmers alike). In some genres, e.g. fighting games, advanced network programming is often demanded, as the netcode and its properties (e.g. latency) are considered by players and critics to be some of the most important metrics of...

Poncke Princen

under then-Colonel A. H. Nasution, from Central Java to "guerrilla cantons" established in West Java - an action

which came to be known as the Long March

Johannes Cornelis Princen (21 November 1925 – 2 February 2002), also known as Poncke Princen, was a Dutch anti-Nazi fighter and activist. In 1948, he deserted the Dutch military, and joined the Indonesian independence guerrillas in the Dutch Indies.

For his anti-Nazi activities, he was imprisoned in several Nazi prisons and camps in the Netherlands and Germany. After defecting to the Indonesian guerrillas who opposed Dutch rule, he lived the rest of his life in Indonesia, where he became a human rights activist and political dissident. Owing to his activism, he spent time in detention in Indonesia.

Data analysis

gathering and measuring information on targeted variables in an established system, which then enables one to answer relevant questions and evaluate outcomes

Data analysis is the process of inspecting, cleansing, transforming, and modeling data with the goal of discovering useful information, informing conclusions, and supporting decision-making. Data analysis has multiple facets and approaches, encompassing diverse techniques under a variety of names, and is used in different business, science, and social science domains. In today's business world, data analysis plays a role in making decisions more scientific and helping businesses operate more effectively.

Data mining is a particular data analysis technique that focuses on statistical modeling and knowledge discovery for predictive rather than purely descriptive purposes, while business intelligence covers data analysis that relies heavily on aggregation, focusing mainly on business information...

Python (programming language)

type-checked and garbage-collected. It supports multiple programming paradigms, including structured (particularly procedural), object-oriented and functional

Python is a high-level, general-purpose programming language. Its design philosophy emphasizes code readability with the use of significant indentation.

Python is dynamically type-checked and garbage-collected. It supports multiple programming paradigms, including structured (particularly procedural), object-oriented and functional

programming.

Guido van Rossum began working on Python in the late 1980s as a successor to the ABC programming language. Python 3.0, released in 2008, was a major revision not completely backward-compatible with earlier versions. Recent versions, such as Python 3.12, have added capabilities and keywords for typing (and more; e.g. increasing speed); helping with (optional) static typing. Currently only versions in the 3.x series are supported.

Python consistently ranks...

Lisp (programming language)

stark contrast to most other languages; for example, Java does not support multiple inheritance and there is no reasonable way to add it. In simplistic

Lisp (historically LISP, an abbreviation of "list processing") is a family of programming languages with a long history and a distinctive, fully parenthesized prefix notation.

Originally specified in the late 1950s, it is the second-oldest high-level programming language still in common use, after Fortran. Lisp has changed since its early days, and many dialects have existed over its history. Today, the best-known general-purpose Lisp dialects are Common Lisp, Scheme, Racket, and Clojure.

Lisp was originally created as a practical mathematical notation for computer programs, influenced by (though not originally derived from) the notation of Alonzo Church's lambda calculus. It quickly became a favored programming language for artificial intelligence (AI) research. As one of the earliest programming...

JKT48

AKB48. Based in Jakarta, the capital and largest city of Indonesia located on the northwest coast of the island of Java, the group has become a cultural phenomenon

JKT48 (pronounced J-K-T-forty-eight) is Indonesia's premier girl group, established in 2011 as the first international sister group of Japan's AKB48. Based in Jakarta, the capital and largest city of Indonesia located on the northwest coast of the island of Java, the group has become a cultural phenomenon. The group does this by blending music, fan interaction, and performance into a unique idol experience. They first adopted the concept of "idols you can meet", before switching to "idols that come to meet you" in April 2018.

The group opened its theater, located on the 4th floor of the fX Sudirman shopping mall in Central Jakarta, Jakarta on 8 September 2012. Fans can attend daily performances, which are subject to change at any time.

While JKT48 membership is not limited to any nationality...

Fandom (website)

"Wikianswers" (not to be confused with the preexisting WikiAnswers). In March 2010, Fandom re-launched "Answers from Wikia", where users could create topic-specialized

Fandom (formerly known as Wikicities and Wikia) is a media conglomerate backed by the private equity firm TPG Capital. The website offers a platform for hosting wiki pages with social media features on various topics such as video games, movies, books, and TV series; and other multimedia databases such as GameFAQs and Metacritic. It also owns several entertainment outlets such as GameSpot and TV Guide, as well as online retailers such as Fanatical.

The privately held for-profit Delaware company was founded in October 2004 by Wikipedia co-founder Jimmy Wales and Angela Beesley. Fandom was acquired in 2018 by TPG Inc. and Jon Miller through Integrated Media Co.

Fandom uses MediaWiki, the same open-source wiki software used by Wikipedia. Unlike the Wikimedia Foundation, the nonprofit organization...
