Comparison of American and British English

The English language was introduced to the Americas by the arrival of the English, beginning in the late 16th century. The language also spread to numerous

The English language was introduced to the Americas by the arrival of the English, beginning in the late 16th century. The language also spread to numerous other parts of the world as a result of British trade and settlement and the spread of the former British Empire, which, by 1921, included 470–570 million people, about a quarter of the world's population. In England, Wales, Ireland and especially parts of Scotland there are differing varieties of the English language, so the term 'British English' is an oversimplification. Likewise, spoken American English varies widely across the country. Written forms of British and American English as found in newspapers and textbooks vary little in their essential features, with only occasional noticeable differences.

Over the past 400 years, the forms...

BASIC interpreter

PRINT. Less frequent commands require more complex key sequences. As every line starts with a keyword, LET is not optional, after a keyword is typed the system

A BASIC interpreter is an interpreter that enables users to enter and run programs in the BASIC language and was, for the first part of the microcomputer era, the default application that computers would launch. Users were expected to use the BASIC interpreter to type in programs or to load programs from storage (initially cassette tapes then floppy disks).

BASIC interpreters are of historical importance. Microsoft's first product for sale was a BASIC interpreter (Altair BASIC), which paved the way for the company's success. Before Altair BASIC, microcomputers were sold as kits that needed to be programmed in machine code (for instance, the Apple I). During the Altair period, BASIC interpreters were sold separately, becoming the first software sold to individuals rather than to organizations...

SpaceX

completed the first key flight test of its Crew Dragon spacecraft, a Pad Abort Test, in May 2015, and successfully conducted a full uncrewed test flight in early

Space Exploration Technologies Corp., commonly referred to as SpaceX, is an American space technology company headquartered at the Starbase development site in Starbase, Texas. Since its founding in 2002, the company has made numerous advances in rocket propulsion, reusable launch vehicles, human spaceflight and satellite constellation technology. As of 2025, SpaceX is the world's dominant space launch provider, its launch cadence eclipsing all others, including private competitors and national programs like the Chinese space program. SpaceX, NASA, and the United States Armed Forces work closely together by means of governmental contracts.

SpaceX was founded by Elon Musk in 2002 with a vision of decreasing the costs of space launches, paving the way to a self-sustaining colony on Mars. In 2008...

Slavery in the colonial history of the United States

color) from these unions were among those in the intermediate social caste of free people of color. The English colonies, in contrast, operated within a binary

The institution of slavery in the European colonies in North America, which eventually became part of the United States of America, developed due to a combination of factors. Primarily, the labor demands for establishing and maintaining European colonies resulted in the Atlantic slave trade. Slavery existed in every European colony in the Americas during the early modern period, and both Africans and indigenous peoples were targets of enslavement by Europeans during the era.

As the Spaniards, French, Dutch, and British gradually established colonies in North America from the 16th century onward, they began to enslave indigenous people, using them as forced labor to help develop colonial economies. As indigenous peoples suffered massive population losses due to imported diseases, Europeans...

European Central Bank

engages in foreign exchange operations, and defines the intermediate monetary objectives and key interest rate of the EU. The ECB Executive Board enforces

The European Central Bank (ECB) is the central component of the Eurosystem and the European System of Central Banks (ESCB) as well as one of seven institutions of the European Union. It is one of the world's most important central banks with a balance sheet total of around 7 trillion.

The ECB Governing Council makes monetary policy for the Eurozone and the European Union, administers the foreign exchange reserves of EU member states, engages in foreign exchange operations, and defines the intermediate monetary objectives and key interest rate of the EU. The ECB Executive Board enforces the policies and decisions of the Governing Council, and may direct the national central banks when doing so. The ECB has the exclusive right to authorise the issuance of euro banknotes. Member states can issue...

US Airways Flight 1549

scheduled to fly from New York City's LaGuardia Airport (LGA) to Seattle–Tacoma International Airport (SEA), with a planned intermediate stop at Charlotte

US Airways Flight 1549 was a regularly scheduled US Airways flight from New York City's LaGuardia Airport to Charlotte and Seattle, in the United States. On January 15, 2009, the Airbus A320 serving the flight struck a flock of birds shortly after takeoff from LaGuardia, losing all engine power. Given their position in relation to the available airports and their low altitude, pilots Chesley "Sully" Sullenberger and Jeffrey Skiles decided to glide the plane to ditching on the Hudson River near Midtown Manhattan. All 155 people on board were rescued by nearby boats. There were no fatalities, although 100 people were injured, 5 of them seriously. The time from the bird strike to the ditching was less than four minutes.

The then-Governor of New York State, David Paterson, called the incident a...

Online shopping

for sale with text, photos, and multimedia files, and sometimes have features such as question and answers or filters, whereas in a physical retail store

Online shopping is a form of electronic commerce which allows consumers to directly buy goods or services from a seller over the Internet using a web browser or a mobile app. Consumers find a product of interest by visiting the website of the retailer directly or by searching among alternative vendors using a shopping search engine, which displays the same product's

availability and pricing at different e-retailers. As of 2020, customers can shop online using a range of different computers and devices, including desktop computers, laptops, tablet computers and smartphones.

Online stores that evoke the physical analogy of buying products or services at a regular "brick-and-mortar" retailer or shopping center follow a process called business-to-consumer (B2C) online shopping. When an online store...

Timeline of United States inventions (1890–1945)

by Henry Perky of Watertown, New York. 1890 Babcock test The Babcock test was the first inexpensive and practical test which were used to determine the

A timeline of United States inventions (1890–1945) encompasses the innovative advancements of the United States within a historical context, dating from the Progressive Era to the end of World War II, which have been achieved by inventors who are either native-born or naturalized citizens of the United States. Copyright protection secures a person's right to the first-to-invent claim of the original invention in question, highlighted in Article I, Section 8, Clause 8 of the United States Constitution which gives the following enumerated power to the United States Congress:

To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries.

In 1641, the first patent in North America was...

Yuri Gagarin

the Union in 1962 and then to the Soviet of Nationalities, the lower and upper chambers of the Supreme Soviet respectively. Vostok 1 was Gagarin's only

Yuri Alekseyevich Gagarin (9 March 1934 – 27 March 1968) was a Soviet pilot and cosmonaut who, aboard the first successful crewed spaceflight, became the first person to journey into outer space. Travelling on Vostok 1, Gagarin completed one orbit of Earth on 12 April 1961, with his flight taking 108 minutes. By achieving this major milestone for the Soviet Union amidst the Space Race, he became an international celebrity and was awarded many medals and titles, including his country's highest distinction: Hero of the Soviet Union.

Hailing from the village of Klushino in the Russian SFSR, Gagarin was a foundryman at a steel plant in Lyubertsy in his youth. He later joined the Soviet Air Forces as a pilot and was stationed at the Luostari Air Base, near the Norway–Soviet Union border, before...

U.S. federal government response to the COVID-19 pandemic

CDC guidelines for testing; those cities were Chicago, New York, San Francisco, Los Angeles, Seattle and Honolulu. Very few tests were successfully completed

The federal government of the United States initially responded to the COVID-19 pandemic in the country with various declarations of emergency, some of which led to travel and entry restrictions and the formation of the White House Coronavirus Task Force. As the pandemic progressed in the U.S. and globally, the U.S. government began issuing recommendations regarding the response by state and local governments, as well as social distancing measures and workplace hazard controls. State governments played a primary role in adopting policies to address the pandemic. Following the closure of most businesses throughout a number of U.S. states, President Donald Trump announced the mobilization of the National Guard in the most affected areas.

During 2020 and 2021, the U.S. Congress passed major stimulus...
