Fuzzy logic

Springer-Verlag. ISBN 978-3-540-71795-9. Steeb, Willi-Hans (2008). The Nonlinear Workbook: Chaos, Fractals, Cellular Automata, Neural Networks, Genetic Algorithms

Fuzzy logic is a form of many-valued logic in which the truth value of variables may be any real number between 0 and 1. It is employed to handle the concept of partial truth, where the truth value may range between completely true and completely false. By contrast, in Boolean logic, the truth values of variables may only be the integer values 0 or 1.

The term fuzzy logic was introduced with the 1965 proposal of fuzzy set theory by mathematician Lotfi Zadeh. Fuzzy logic had, however, been studied since the 1920s, as infinite-valued logic—notably by Łukasiewicz and Tarski.

Fuzzy logic is based on the observation that people make decisions based on imprecise and non-numerical information. Fuzzy models or fuzzy sets are mathematical means of representing vagueness and imprecise information (hence...

Leadership

York: Wadsworth. ISBN 9780495599524. Aamodt, M.G. (2010). I/O applications workbook: Industrial/organizational psychology an applied approach. Belmont, CA:

Leadership, is defined as the ability of an individual, group, or organization to "lead", influence, or guide other individuals, teams, or organizations.

"Leadership" is a contested term. Specialist literature debates various viewpoints on the concept, sometimes contrasting Eastern and Western approaches to leadership, and also (within the West) North American versus European approaches.

Some U.S. academic environments define leadership as "a process of social influence in which a person can enlist the aid and support of others in the accomplishment of a common and ethical task". In other words, leadership is an influential power-relationship in which the power of one party (the "leader") promotes movement/change in others (the "followers"). Some have challenged the more traditional managerial...

Urdu

Gregory Maxwell. "2 The Arabic Element",. Urdu Vocabulary: A Workbook for Intermediate and Advanced Students, Edinburgh: Edinburgh University Press,

Urdu is an Indo-Aryan language spoken chiefly in South Asia. It is the national language and lingua franca of Pakistan. In India, it is an Eighth Schedule language, the status and cultural heritage of which are recognised by the Constitution of India. It also has an official status in several Indian states.

Urdu and Hindi share a common, predominantly Sanskrit- and Prakrit-derived, vocabulary base, phonology, syntax, and grammar, making them mutually intelligible during colloquial communication. The common base of the two languages is sometimes referred to as the Hindustani language, or Hindi-Urdu, and Urdu has been described as a Persianised standard register of the Hindustani language. While formal Urdu draws literary, political, and technical vocabulary from Persian, formal Hindi draws these...

Drawing up a comprehensive list of words in English is important as a reference when learning a language as it will show the equivalent words you need to learn in the other language to achieve fluency. A big list will constantly show you what words you don't know and what you need to work on and is useful for testing yourself. Eventually these words will all be translated into big lists in many different languages and using the words in phrase contexts as a resource. You can use the

list to generate your own lists in whatever language you're learning and to test yourself.
