

D4d Engine

Renault D-Type engine

2005–2011 Proton Savvy 2009–2016 Dacia Logan 2009–2016 Dacia Sandero The D4D was a 16V 1.0 L; 61.0 in3 (999 cc) version. Applications: 1997–2001 Renault

The Renault DiET engine also known as "D engine" or "D-Type" is a straight-4 automobile petrol engine from Renault designed to replace the existing Cléon-Fonte engine in the Renault Twingo.

Caterpillar D4

4-cylinder D4400 engine Caterpillar D4

1947-59 6U1 > 6U12781, 7U1-7U44307 Cat 4-cylinder D315 engine. Caterpillar D4C - 1959-63 Caterpillar D4D - 1963-77 Caterpillar - The Caterpillar D4 track-type tractor is a small bulldozer manufactured by Caterpillar Inc.

Caterpillar first introduced the RD4 in 1936, as the diesel follow on to the successful CAT 30 gas model. The RD4 originally weighed in at 10,000 pounds (4,500 kg), and used Caterpillar's D4400 engine, an inline four-cylinders, with a 4.25 by 5.50 inches (108 mm × 140 mm) bore and stroke. In 1935 Caterpillar had started the naming convention of "RD" for diesel or "R" for regular gasoline, followed by a number to indicate the relative engine size. In 1937, the "R" was dropped, and just a "D" was used for the diesel versions. At the time of introduction of the RD4, the D4400 engine produced about 43 horsepower (32 kW) at the drawbar so the 4 indicated the relative engine power. The D4 U series was fitted...

Rev Racing

Suarez, Pena, and Gifford returned as D4D drivers, while Mackena Bell returned for her 5th season (though not part of D4D). They were joined by rookie K&N

Rev Racing, short for Revolution Racing, is an auto racing team competing at the regional level of NASCAR. Owned by former Dale Earnhardt, Inc. president Max Siegel, the team primarily fields participants in the Drive for Diversity, an initiative to bring more minority and female drivers into the sport. In all three ARCA Menards Series, the team currently fields two Chevrolet SS teams: The No. 2 part-time for Lanie Buice and the No. 6 full-time for Lavar Scott. The team also fields late model entries for various drivers, and has fielded entries for future NASCAR national series winners Kyle Larson, Bubba Wallace, and Daniel Suárez in the past. The team formally competed in the NASCAR Craftsman Truck Series.

Travel Air

the most famous[citation needed] of the open cockpit biplanes was N434N, a D4D (the ultimate derivative of the BW) painted in Pepsi colors for airshow and

The Travel Air Manufacturing Company was an aircraft manufacturer established in Wichita, Kansas, United States in January 1925 by Clyde Cessna, Walter Beech, and Lloyd Stearman.

An early leader in single-engine, light-aircraft manufacturing, from 1925 to 1931, Travel Air was the largest-volume aircraft manufacturer in the United States in 1928 -- the principal contributor to Wichita becoming named the "Air Capital City" by the Aeronautical Chamber of Commerce.

Travel Air produced the trend-setting Travel Air Mystery Ship racer, which forced radical changes in U.S. military aircraft. Travel Air also developed early small airliners, including Delta Airlines' first, and the first civilian plane to reach Hawaii by air.

With Walter Beech as its last President, the company was acquired by Curtiss...

Toyota Avensis

is reinforced. Finally, the 2.0L D4D 85 kW (115 hp) diesel engine is replaced by the 2.0L D4D 93 kW (126 hp) engine. This, coupled to a six-speed manual

The Toyota Avensis (Japanese: トヨタアベンシス, Hepburn: Toyota Abenshisu) is a mid-size/large family car built in Derbyshire, United Kingdom by the Japanese automaker Toyota from October 1997 to August 2018. It was the direct successor to the European Carina E and was available as a four-door saloon, five-door liftback and estate.

The Avensis was introduced in 1997, to create a more modern name when compared with the Carina E. The "Avensis" name is derived from the French term avancer, meaning "to advance" or "move forward". The Avensis was not sold in North America, and it is related to the Scion tC coupé. It also shared a platform with the Allion and Premio and was available at Japanese dealership network Toyota Netz Store.

An MPV called the Avensis Verso (Ipsum in Japan and previously the Picnic...

Toyota L engine

The L family is a family of inline four-cylinder diesel engines manufactured by Toyota, which first appeared in October 1977. It is the first diesel engine from Toyota to use a rubber timing belt in conjunction with a SOHC head. Some engines like the 2L-II and the 2L-T are still in production to the present day. As of August 2020, the 5L-E engine is still used in Gibraltar in the fifth-generation Toyota HiAce, eighth-generation Toyota Hilux, second-generation Toyota Fortuner, and fourth-generation Toyota Land Cruiser Prado. Vehicles with the diesel engine were exclusive to Toyota Japan dealership locations called Toyota Diesel Store until that sales channel was disbanded in 1988.

NASCAR Driver Development Program

NASCAR Driver Development Program (formerly known as Drive for Diversity / D4D) program is a development system instituted by the American auto racing league

The NASCAR Driver Development Program (formerly known as Drive for Diversity / D4D) program is a development system instituted by the American auto racing league NASCAR. The program's purpose is to attract minority and female individuals to the sport, primarily as drivers, but also including ownership, sponsorship, and crew member roles, and to attract a more diverse audience to the sport. Before an applicant is accepted into the program, their resumes are checked by NASCAR officials. The system is similar to a driver development program where applicants progress through minor-league and regional racing levels to prepare them for a possible shot at one of NASCAR's three national series. The program was started during the 2004 season by NASCAR marketing executives in order to attract female...

Travel Air 4000

Phillips 1994, pp.91,93 Phillips 1994, p.102 Phillips 1994, p.99 "Travel Air D4D" Pelletier 1995, pp.33–34 Pelletier 1995, p.34 Phillips 1994, p.95 Phillips

The Travel Air 4000 is an American general-purpose biplane of the 1920s, a member of the family of aircraft that began with the Travel Air Model A. It was later known as the Model 4. Derived from the Model BW, around 100 were built, including two that were converted from Model 2000s.

Toyota Hilux

5L engine 2000–2001: Hilux Tiger with the 3.0 L 5L-E EFI engine 2001: Hilux Tiger with 1KZ engine (short-lived and immediately replaced by D4D engine) Late

The Toyota Hilux (Japanese: トヨタ・ヒルックス, Hepburn: Toyota Hairakkusu), stylised as HiLux and historically as Hi-Lux, is a series of pickup trucks produced and marketed by the Japanese automobile manufacturer Toyota. The majority of these vehicles are sold as a pickup truck or cab chassis, although they could be configured in a variety of body styles.

The pickup truck was sold with the Hilux name in most markets, but in North America, the Hilux name was retired in 1976 in favor of Truck, Pickup Truck, or Compact Truck. In North America, the popular option package, the SR5 (Sport Runabout 5-Speed), was colloquially used as a model name for the truck, even though the option package was also used on other Toyota models, like the 1972 to 1979 Corolla. In 1984, the Trekker, the wagon version of the...

Future Launchers Preparatory Programme

mass for the Vega, Ariane 6 and Soyuz launchers. The design for demise (D4D) project investigates the processes that launch vehicle components undergo

The Future Launchers Preparatory Programme (FLPP) is a technology development and maturation programme of the European Space Agency (ESA). It develops technologies for the application in future European launch vehicles and in upgrades to existing launch vehicles. By this it helps to reduce time, risk and cost of launcher development programmes.

Notable projects of FLPP include the IXV re-entry demonstrator that flew to space in 2015, the Vinci rocket engine used on Ariane 6 since 2024, the future uncrewed reusable space plane Space Rider, the Prometheus reusable rocket engine, and the Themis reusable rocket prototype.
