There is an abundance of books and advice on the topics of personality development and achieving success. However, there is none that discusses both topics under one cover. This book brings those two concepts together in a manner that will help readers to achieve excellence in all facets of life. Most of the books on personality development focus on giving tips and tricks to change an individual's personality or they preach altruism. Tips and tricks are good enough for a season, but they do not work in the in the long term. They don't provide enough adaptability through rapid changes. Altruism is very good on paper, but is well neigh impossible to practice all though one's life. The other books on personality development are vague on the topic of development – development in which direction, how much development, or when can I stop development? After all, one cannot continue to be only “developing” through an entire life span! Success in Life through Personality Engineering provides answers to these questions and more. This book starts with an introduction to the concept of personality engineering immediately followed by a chapter discussing tools and techniques that aid in the process of personality engineering. This book contains chapters on excelling in studies; obtaining the right job and achieving success in the career; making choices in life, finding the right life partner; achieving success in marriage; achieving financial success; debt management; parenting success; managing popularity; health and wellness; security in life; and finally pursuing excellence in life. Every chapter identifies traits that need engineering., tools and techniques that aid in engineering, and tips for achieving success in the topic at hand.This book brings you the concepts, tools, and techniques used by modern management in the activities associated with managing complex organizations, which traditionally have not been available to the general public. 360° Personality Development In The 21st Century

Life is a quest to better ourselves and the condition of our way of living, on the whole. We search for who we are, what our purpose is here for and how we can contribute to the world in order that we can realize more value in ourselves and our existence. The quest for self-improvement is a life-long process. It begins from early puberty until the day we die. Once realization sets in, the quest never ends. It doesn't mean that we have our whole lifetime to grow-up. It simply means that as we mature in years, we should see to it that we also grow in our insights about other people and the world in general so that we become less self-absorbed and more selfless, considerate and bighearted. Improving one's self and one's life is a lifestyle choice. It takes a great amount of practice and determination so that the behavior pattern or attitude becomes habit-forming. When it becomes a part of your everyday life, you'll only want to keep improving yourself and your life as the years go by. This book will give you some great words of advice on improving your life. Here's a preview of sorts: 1. Practice generosity. Be more appreciative of other people. On a daily basis, make it a point to give a kind praise to an officemate, a helping hand to forlorn friend or even give money and food to poor people. Appreciation is kindness and it will always return to you tenfold. 2. Learn to accept the things you cannot change. You cannot change everything in your life. Realize what these things are and then take them on, start working with them instead of against them.

The network marketing business runs in the similar way. But its special feature is that here no one is owner or servant. Any firm launches its product and gives directly to consumer. No middlemen policy. The consumer gives it to other consumers like him, in return company gives share of its profit. This system goes on like this. Every person keeps on joining some persons with him and a chain in the net form gets established. The person who has large number of people along with him earns high profit.

The Big Leap

Children's Companion is a compendium of suggestions put forth in the best interest of the growing children across the nations. The author has nicely read the mind of young learners overburdened with vast syllabi and exhaustive homework and established a very good rapport with them through direct communication. His concern for their all round personality development is commendable. The author appears visibly moved by the plight of underprivileged and ill-treated children. He sincerely desires them to be painstaking, industrious and communicative. Quite pertinently, advices nowhere appear didactic. Young guys may hopefully consider the book, essentially a valuable treasure of inspiration and practical tips, as their true companion. Although the book is primarily intended for school children, it is equally readable by the parents, teachers and all stakeholders concerned with the advancement of mental faculties of pre-adolescents. The book deserves special reference while making policies for children by virtue of its merit.
