JMP (pronounced "jump") is a suite of computer programs for statistical analysis and machine learning developed by JMP, a subsidiary of SAS Institute. The program was launched in 1989 to take advantage of the graphical user interface introduced by the Macintosh operating systems. It has since been significantly rewritten and made available for the Windows operating system.

The software is focused on exploratory visual analytics, where users investigate and

explore data. It also supports the verification of these explorations by hypothesis testing, data mining, or other analytic methods. Discoveries made using JMP's analytical tools are commonly applied for experimental design.

JMP is used in applications such as data mining, Six Sigma, quality control, design of experiments, as well as for...

Radiocarbon dating (also referred to as carbon dating or carbon-14 dating) is a method for determining the age of an object containing organic material by using the properties of radiocarbon, a radioactive isotope of carbon.

The method was developed in the late 1940s at the University of Chicago by Willard Libby. It is based on the fact that radiocarbon (^{14}C) is constantly being created in the Earth's atmosphere by the interaction of cosmic rays with atmospheric nitrogen. The

resulting ^{14}C combines with atmospheric oxygen to form radioactive carbon dioxide, which is incorporated into plants by photosynthesis; animals then acquire ^{14}C by eating the plants. When the animal or plant dies, it stops exchanging carbon with its environment, and thereafter the amount of ^{14}C it contains begins to decrease...

The V2 (German: Vergeltungswaffe 2, lit. 'Vengeance Weapon 2'), with the technical name Aggregat-4 (A4), was the world's first long-range guided ballistic missile. The missile, powered by a liquid-propellant rocket engine, was developed during the Second World War in Nazi Germany as a "vengeance weapon" and assigned to attack Allied cities as retaliation for the Allied bombings of German cities. The V2 rocket also became the first artificial object to travel into space by crossing the Kármán line (edge of space) with the vertical launch of MW 18014 on 20 June 1944.

Research of military use of long-range rockets began when the graduate studies of Wernher von Braun were noticed by the German Army. A series of prototypes culminated in the A4, which went to war as the V2. Beginning in September...

The Altaic () languages was a proposed, now obsolete widely rejected language family, comprising the Turkic, Mongolic and Tungusic language families, with some linguists having included the Koreanic and Japonic families. The proposed Altaic language family is no longer considered valid, as linguistic similarities among Turkic, Mongolic, and Tungusic languages are better explained by areal convergence within a Sprachbund, rather than by a shared genetic lineage—a phenomenon observed cross-linguistically in diverse language families worldwide.

These languages share agglutinative morphology, head-final word order and some vocabulary. The once-popular theory attributing these similarities to a common ancestry has long been rejected by most comparative linguists in favor of language contact, although...

The Volkswagen Tiguan (German pronunciation: [ˈfɔlksˌvaːɡn̩ ˈtiːɡʊaːn]) is a sport utility vehicle produced by German manufacturer Volkswagen since 2007, sitting between the smaller T-Roc and the larger Touareg in the company's crossover SUV range. The first generation was based on the PQ46 platform, while the second generation, released in 2016, utilizes the Volkswagen Group MQB A2 platform. It is generally considered to be a medium-sized SUV in Europe, while in North America it is considered to be a compact crossover SUV.

The name Tiguan is a portmanteau of the German words Tiger ("tiger") and Leguan ("iguana") and won a naming contest by German car magazine publisher Auto Bild—from a field of names that also included Namib, Rockton, Samun and Nanuk.

As of the spring of 2020, six million...

Julian Huxley used the phrase "the eclipse of Darwinism" to describe the state of affairs prior to what he called the "modern synthesis". During the "eclipse", evolution was widely accepted in scientific circles but relatively few biologists believed that natural selection was its primary mechanism. Historians of science such as Peter J. Bowler have used the same phrase as a label for the period within the history of evolutionary thought from the 1880s to around 1920, when alternatives to natural selection were developed and explored—as many biologists considered natural selection to have been a wrong guess on Charles Darwin's part, or at least to be of relatively minor importance.

Four major alternatives to natural selection were in play in the 19th century:

Theistic evolution, the belief...

Audi A6

releases new A6 and A7 Black Edition versions". SkiddMark. November 2012. Retrieved 14 July 2015. Jonathon Ramsey (5 December 2012). "Your 2013 Audi RS6

The Audi A6 is an executive car manufactured by the German company Audi since 1994. Now in its fifth generation, the successor to the Audi 100 is manufactured in Neckarsulm, Germany, and is available in saloon and estate configurations, the latter marketed by Audi as the Avant. Audi's internal numbering treats the A6 as a continuation of the Audi 100 lineage, with the initial A6 designated as a member of the C4-series, followed by the C5, C6, C7, and the C8. The related Audi A7 is essentially a Sportback (liftback) version of the C7-series and C8-series A6 but is marketed under its own separate identity and model designation.

All generations of the A6 have offered either front-wheel-drive or Torsen-based four-wheel-drive, marketed by Audi as their quattro system. The A6 has also been used as...

Pubic hair

Pubic hair (or pubes ,) is terminal body hair that is found in the genital area and pubic region of adolescent and adult humans. The hair is located on and around the sex

organs, and sometimes at the top of the inside of the thighs, even extending down the perineum, and to the anal region. Pubic hair is also found on the scrotum and base of the penile shaft (in males) and on the vulva (in females). Around the pubis bone and the mons pubis that covers it, it is known as a pubic patch, which can be styled.

Although fine vellus hair is present in the area during childhood, pubic hair is considered to be the heavier, longer, coarser hair that develops during puberty as an effect of rising levels of hormones: androgens in males and estrogens in females.

Many cultures regard pubic hair as erotic...
