

Quick Desktop Application Development Using Electron

Develop Desktop Application Using Html Css And Javascript

Quasar Framework

App, using Cordova for iOS & Android, and to a Desktop App, using Electron for Mac, Windows, and Linux. Quasar was created by Razvan Stoenescu and is maintained

The Quasar Framework (commonly referred to as Quasar; pronounced) is an open-source Vue.js based framework for building apps with a single codebase. It can be deployed on the Web as a SPA, PWA, SSR, to a Mobile App, using Cordova for iOS & Android, and to a Desktop App, using Electron for Mac, Windows, and Linux.

Quasar was created by Razvan Stoenescu and is maintained by a small team of developers (also known as the "core team") and contributors. Most from the core team currently work at various companies such as Lenovo, IntelliView Technologies Inc. and AG Development Services.
