The history of women in the United States encompasses the lived experiences and contributions of women throughout American history.

The earliest women living in what is now the United States were Native Americans. European women arrived in the 17th century and brought with them European culture and values. During the 19th century, women were primarily restricted to domestic roles in keeping with Protestant values. The campaign for women's suffrage in the United States culminated with the adoption of the Nineteenth Amendment to the U.S. Constitution in 1920. Good articles in Wikipedia

A good article (GA) is a Wikipedia article that meets a core set of editorial standards, the good article criteria, passing through the good article nomination process successfully. They are well-written, contain factually accurate and verifiable information, are broad in coverage, neutral in point of view, stable, and illustrated, where possible, by relevant images with suitable copyright licenses. Good articles do not have to be as comprehensive as featured articles (FA), but they should not omit any major facets: a comparison of the criteria for good and featured articles describes further differences.
